

We can all see through the object of the glass trust.

Everyone seems to be getting their overcoats out of "soak."

"Necessity is the mother of invention." We have noticed no good substitute for coal, as yet.

Late dispatches state that the new Boxer uprising in China is led by a woman. No news lately of Carrie Nation!

Guess this year's football teams are not up to the standard. To date only one man has been killed or seriously injured.

A scientist now claims there are germs in the telephone. Must be something in most of them. One can hardly talk over them.

Yes, we have the horseless carriage and all the other late inventions, but worse than these, we have a coalless winter ahead of us.

In England they are using the "red light" cure for disease. In New York they abolished the "red light" as a partial cure for vice.

Problem in arithmetic: If hard coal sells for \$18 a ton in New York, how many ounces will an average week's salary buy in Okolona?

The Okolona Commercial Club might very profitably get together now, and then do something that will add to the future advantage of the city.

An iron and steel trust has been organized to operate in China. Pretty tough to have to pay that war indemnity and harbor a steel trust too.

We started in to say something about that young crown prince of Siam, but his name stalled us. Still, he is said to be a very nice young man.

"Our Girls Must Be Firm," says the Chicago Inter-Ocean. There is no need for worry there. Most of our girls will get married and then they will be the head of the firm.

Uncle Sam may have whipped Spain, but that country certainly out-traded us. Something new to pay her for shows up every day. The latest is an old, leaky floating dry dock.

Grenada has just held a big fair and floral display, which attracted a large number of people from the country round about to their city, and everybody seems delighted over the success attained.

The National Dressmakers' Convention some time ago decided to abolish the style of long trains to dresses. Now the so-called clumsy men will have a little peace when in the ladies' company.

The peanut trust is dead. While it came in for its share of roasting along with the other trusts, we hardly think that was the cause of its demise. More than probable it was frozen out.

Some safe blowers got in their work in Memphis the other night. A safe was totally wrecked, and \$500 taken from it by the burglars, who made their escape easily before the police could be found and sent after them.

Nicolas Tesla, the great inventor, couldn't invent a good and sufficient excuse for not serving on a jury. We must have brighter men in our "neck of the woods" who are "hiding their lights under a bushel."

A Kansas woman swallowed a chicken bone, which stuck in her throat and kept her from talking for two days. Such accidents will cause a serious decrease in the sale of chickens, to the ladies especially.

Governor Odell in opening the Republican state campaign in New York, tried to focus attention on the Philippines, but the Democrats are not fooling after such small game. They are after the trusts now.

Secretary Wilson announced some time ago that beer would soon be cheaper. No change in price has been noticed in this locality. Suppose it will be about the same time that trusts begin killing each other off by competition. (!)

Let us not forget, since trade is looking up again, that the season for activity will find its end again, unless we do something to build up industrial interests here which will increase the pay roll of the city to skilled people and give them money to spend the year round.

It will be a long time before the resbyterians of New Orleans will be a successor for the late Dr. Palmer, save in point of rotation. There is an occasional man like Dr. Palmer who passes away without any one being in reach to suc-

ceed him. He was a great man and a grand preacher.

The bluff of the business men of Vicksburg to the governor offering to pay the expenses for an extra session of the legislature to consider the insurance question, was little improvement upon the policy pursued by the governor himself. Such an offer could not be accepted, of course.

Four dead bodies were found tied up in sacks and laid in the street back of a medical college in Indianapolis the other morning, and the officers are trying to find out where they came from and who left them where they were found. But they won't find out. After a body is dead, can't tell much about its wanderings.

Gen. Alger has been appointed senator from Michigan to fill the vacancy caused by the death of Senator McMillan, and as the General is a candidate for the same seat at the next meeting of the legislature, he will have an opportunity to get his national as well as his state wires to working properly before the legislature meets.

The Alabama people are wrestling with the dispensary liquor question, but the prediction is that it will not succeed. In our judgment it is little better than the bootleg system, further than to transfer the traffic from the loafing negro to the sworn official who will manage to worm himself into place to get to handle the stuff. The more you think over the question of handling liquor sales, the more apparent it will be that high license is the best of any plan that has yet been tried.

Senator D. H. Money, of Mississippi, was the orator of the evening at a meeting held last evening in the Confederate Veterans' Hall, corner Eleventh and E. streets, where a large number of Mississippians together with their families assembled for the purpose of reorganizing a social organization among the natives of that state, now residents of this city. Senator Money took for his theme "Mississippi," and spoke for upwards of an hour. He referred in eloquent terms to the stand taken by his native state in regard to the recognition of its women, saying that the first woman's college in the United States was chartered by that state and that it established the first girl's industrial college. Mississippi, the senator said, was the first state to

**CATARRH**

The treatment of Catarrh with antiseptic and astringent washes, lotions, salves, medicated tobacco and cigarettes or any external or local application, is just as senseless as would be kindling a fire on top of the pot to make it boil. True, these give temporary relief, but the cavities and passages of the head and the bronchial tubes soon fill up again with mucus.

Taking cold is the first step towards Catarrh, for it checks perspiration, and the poisonous acids and vapors which should pass off through the skin, are thrown back upon the mucous membrane or inner skin, producing inflammation and excessive flow of mucus, much of which is absorbed into the blood, and through the circulation reaches every part of the system, involving the Stomach, Kidneys and other parts of the body. When the disease assumes the dry form, the breath becomes exceedingly foul, blinding headaches are frequent, the eyes red, hearing affected and a constant ringing in the ears. No remedy that does not reach the polluted blood can cure Catarrh. S. S. S. expels from the circulation all offensive matter, and when rich, pure blood is again coursing through the body the mucous membranes become healthy and the skin active, all the disagreeable, painful symptoms disappear, and a permanent, thorough cure is effected.

S. S. S. being a strictly vegetable blood purifier does not derange the Stomach and digestion, but the appetite and general health rapidly improve under its tonic effects. Write us about your case and get the best medical advice free. Book on blood and skin diseases sent on application.

**GROCERIES.**

We believe the public will bear us out in the claim that one of our strongest points is that when we sell an article it is invariably as we represent it. Another point is that those who go everywhere else without finding what they want, come to us and secure it. This is because we keep our stock up to the requirements of the trade of this section, and those who patronize us, never need to look further.

**OKOLONA**

As we verily believe, is the best trading point for the farmers who visit it, of any town in North Mississippi, and it has always been our pride to merit the largest possible share of that trade.

Please Call and See Us. North Side of Main Street. OKOLONA, MISS.
